HUMMING BIRD THE FLOWER GOD

Our continent has a monopoly of humming birds, the gems of the feathered creation. Of these there are said to be as many as 400 species, must of which confine themselves to the tropfeal regions.

Only eighteen varieties live further north than Mexico. It is generally thought that humming birds live upon honey. This, however, is a mistake. They do devour some honey, it is true, but most of their food consists of the small insects which inhabit certain Sowers.

The little bird is therefore useful as well as beautiful and has been called a flower to which God has granted

wings. Humming birds are so small that when they are captured for commercial purposes it is impossible to use even smallest shot for fear of injuring their skins. They are therefore stunned with a drop of water from a how gun or syringe and fall into

a net, when they are quickly poisoned. Humming birds vary in size from those half as large as a sparrow to those about the size of a bee. Their flight is so swift that they can be well seen only when poised on a flower. The little creatures bid fair to be exterminated on account of the senseless and cruel fashion of using them as trimming for women's hats. -From the Ave Maria,

THINKS SPANKINGS BENEFIT PRISONERS

Arguing that while a man's body may be developed his mind is still much like a child's Capt. Fred Fornoff, of the mounted police of New Mexico, advocates "spanking" prisoners in the penitentiaries. The captain was a visitor at the local police station Friday.

He decried the present system of the penitentiaries, stating that while they should promote reformation, they had the opposite tendencies. The system in Norway, where, he said, those who were sent to the penitentiaries were forced to go to school six hours and work for a like period, he approved.

There were 15 murders in New Mexico during the past year, the captain said, 35 for every 100,000 inhabitants. That record, with the exception of the Isle of Sicily, where the "black hand" was in vogue, he said could not be equalled anywhere. Arguing that while a man's hody may
